

## LIST OF APPLICATIONS (X64)

Special thanks go to:

**Apocaliptica** - for the format of colors, alphanumeric order, and posting of X64 applications.

**SeaChange** - for the first member to post multiple application in one posting, with detailed reasons why things went wrong or how to get them to operate properly.

**linuxgeekintraining** - for the first member to post what security applications will not work due to various reasons and for listing those reasons.

---

**GREEN** - means working fine

**YELLOW** - means working, but unstable or only with tricks

**RED** - means not working

All programs tested at Windows Server 2008 Enterprise x64

### 0-9

**7-Zip 4.57 x64**

**3DMark06**

### A

**Adobe Acrobat Reader 8.1**

**Adobe Photoshop CS2**

**Auto GordianKnot 2.45**

**AviDemux 2.5**

**ArtMoney 7.27**

**Azureus Vuze 3.0.22** - works, but takes a very long time to download things  
Atitool testing modes and overclocking doesnt work properly on x64 (missing driver signatation?)

**B**

**C**

**Coretemp 097.1 and newer** - Now Vista x86 + x64 ready!

**Cfosspeed Trafficshaping 4.2**

**CPU-Z 1.44.1**

**D**

**DaemonTools 4.12.2**

**DBPowerAMP 11.5 Musik Converter**

**E**

**Ebay TurboLister 2**

**Eset NOD32 Anti-Virus Home 3.0.642 - doesnt work**

**Eset NOD32 Anti-Virus Business Edition 3.0.642**

**Everest Ultimate 4.0 and newer**

**F**

**Firefox 2.0.0.12**

**Foobar 2000**

**FlashFXP**

**G**

**Googletalk**

**GCFscape 1.66 and newer**

**GPU-Z 0.17**

**H**

**I**

**J**

**K**

**L**

**M**

**Microsoft Office 2003/2007/Project**

**MIRC 6.21 and newer**

**Media Player Classic**

**Mozilla Thunderbird 2.0.0.12**

**MSI Dual-Core Center Live Update 3** - works, but very awful

**N**

**Nero 8.2.8.0.**

**nLite 1.4.1**

**O**

**Opera 9.26**

**P**

**Prime95**

**Q**

**QuickTime**

**R**

**Raxco Perfect Disk 8.0**

**RivaTuner 2.08**

**RouterControl 1.8**

**S**

**Skype 3** - crashes after 1-10 seconds, use older version  
[http://filehippo.com/download\\_skype/2473/](http://filehippo.com/download_skype/2473/)

**Safari 3.1**

**Steam Install.msi**

## T

**Teamspeak 2**

**Tuneup Utilities 2008** - detects a Windows Server 2003 version, but works

## U

**UltraIso 8** - works

## V

**Vendrilo**

**Video Lan Client**

**VistaBootPro 3.3.0** - unstable and a lot of errors

**Vista Manager 1.40**

**VMWare 6**

**vLite 1.1.1**

**VirtualDub 1.7.7 AMD64** - starts, but always says: VirtualDub requires a Video for Windows (VFW) compatible codec to decompress.

## W

**Winrar 3.71**

**Windows Live Messenger 8.5** - downloader doesnt work, download the offline installer

## X

**Xp Anti-Spy**

## Z

UltraMon has been found to (Realtime Soft, <http://realtimesoft.com/ultramon/>) mess up the Aero Theme and puts it back to non-Aero.

LogonStudio Vista x64 (<http://www.stardock.com/products/logonstudio/>) does not change the logon screen, it does nothing.
